NETWORK MEDIAPLAYER-350 WLAN

PLAY YOUR HIGH DEFINITION MOVIES DIRECTLY ON YOUR TV!

The Freecom Network MediaPlayer-350 WLAN plays your DivX, MPEG-4 films, holiday photos or MP3/WMA/OGG music tracks over the TV or stereo system. This multi-talented device can play all multimedia files from your PC network in your living room via WiFi (WLAN) connection. The Network MediaPlayer-350 WLAN can also be used as an external Wireless/USB storage solution. Connect it to your PC via WiFi/USB 2.0 or LAN, store your data on the integrated hard disk and enjoy Wireless High Definition multimedia files with friends and family.

- Play movies, photos or music from your PC network via WiFi or LAN on the TV / Hi-Fi
- Stream your favourite multimedia content from the internal hard drive, from your PC, or from USB attached devices and watch them directly on your TV
- With Wireless (11g), LAN, USB 2.0, audio and video connection
- Attach your USB devices and play files directly on your TV
- Extremely quiet – works without a cooling fan
- Including DVI, YUV, S-VIDEO and optical connections for optimal rendering
- Only 185 x 150 x 57 mm in size

MEDIAPLAYER XS - THE CONCEPT

HOW YOUR USB HARD DRIVE BECOMES A MEDIA PLAYER

External USB hard drives are a common PC accessory in every household. A lot of these drives are used to store (downloaded) movies and music on. Problem is… everytime you want to look at a movie from this hard drive you need to go behind your PC or notebook to watch it. Not the ideal screen to watch a movie on… It would be so much better to be able to watch this movie sitting on your couch, looking at your TV screen in your living room.
Freecom makes it all possible, with the new MediaPlayer XS. Simply connect your USB hard drive (no matter which brand!) to the MediaPlayer XS, connect the MediaPlayer XS to your TV, and you're ready to watch movies directly from your hard drive, without the use of a PC, in the comfort of your own living room!
The remote-controlled MediaPlayer XS supports all common AV file formats, is conveniently small and very cost-effective!! The perfect upgrade for your USB hard drive. Of course the concept also works with other USB devices such as a USB stick.
